## TECHNOLOGY PARTNERS

Southwest Microwave provides perimeter detection systems that integrate seamlessly into our customers' overall security programs. Our INTREPID™ systems interface directly with the control and monitoring platforms of these leading suppliers in all kinds of security applications.

All interface development is performed exclusively by our Technology Partners, with SDK and testing support from Southwest Microwave. We encourage you to contact any of our Technology Partners directly to find an integrated solution that is right for you.

[Learn more](#) about INTREPID™ SDK options for integrating to our INTREPID™ MicroPoint™ II, MicroNet™ II, MicroTrack™ II and MicroWave 330 perimeter intrusion detection systems.

### Advancis

Advancis is a global leader in the Physical Security Information Management (PSIM) industry with offices and partners around the globe. The company was founded in 1994 with the goal of developing a command and control management platform to unify disparate security systems and to provide real-time incident handling for security control rooms.

WinGuard by Advancis is a highly stable, scalable and vendor-neutral command and control platform for the integration of security, building and communication technology systems. Advancis works closely in partnership with an expanding community of international system and equipment manufacturers to ensure the integration and compatibility with WinGuard. A broad portfolio of interfaces is available and continues to be extended.

**Product:** WinGuard

**Interfaces to:** [INTREPID Series II \(RPM II\)](#)

### ALPHAOPEN

ALPHAOPEN develops Security and Building Management software solutions used in commercial, government and residential applications throughout Russia and Europe. The company's software design strategy focuses on employing leading-edge development approaches to integrate all of a facility's physical security devices and building automation controllers into a global intelligent security and building management system delivering real time situation management. ALPHAOPEN total security and building management solutions integrate CCTV, access control, intrusion detection, fire protection, critical condition monitoring, lighting systems and more.

---

### Cathexis

Established in 1999, Cathexis develops video surveillance solutions for blue-chip customers across the globe. The CathexisVision IP Video Management Software suite provides extensive sophisticated surveillance tools and functionality to satisfy security and infrastructure management requirements across many vertical markets. Cathexis' customer focus, reputation for exceptional support, product enhancements, and feature-rich, powerful integration capabilities set them apart.

**Product:** [CathexisVision](#)

**Interfaces to:** [INTREPID™ Series II](#) (IPP II, RPM II)

### CNL

CNL offers Physical Security Information Management software (PSIM) designed for complete Integrated Situation Management. Their award-winning Situational Awareness technology is deployed to secure major cities, critical infrastructure protection and global commerce. CNL's software sits at the heart of some of the largest, most complex and groundbreaking security integration projects in the world. Their work with leading IT and Security Integrators is helping to shape the future of security by offering thought leadership on key issues such as asset protection, energy reduction, process compliance and business advantage in converged physical environments.

**Product:** [IPSecurityCenter™](#)

**Interfaces to:** [MicroPoint™ Cable](#), [MicroPoint™ II](#) (IPP II)

**Website:** [www.cnlsoftware.com](http://www.cnlsoftware.com)

### Digifort

The Digifort solution presents itself in products that cover all the needs of the surveillance and intelligence in video monitoring, providing solutions that cover small 8 camera systems to major projects with multiple locations managed from a single central with 30,000 + active channels. With presence in more than 120 countries and a solid trajectory and reputation which covers the globe delivering stability and best of product, looking for excellence, integrating new technologies, always providing relevant improvements and leading the VMS market to introduce a new concept in security.

**Product:** [Digifort Enterprise VMS](#)

**Interfaces to:** [INTREPID™ Series II](#) (IPP II, RPM II)

**Website:** [www.digifort.com](http://www.digifort.com)

**Email:** [sales@digifort.com](mailto:sales@digifort.com)

---

## DESICO

DESICO is an engineering services company specialized in carrying out automation and control projects for the security market. Its activity is focused on the development, implementation and start-up of integration systems, specialized in SCADA and management products for the integration of security systems.

**Product:** [VIGIPLUS](#)

**Interfaces to:** [MicroPoint™ II](#) (RPM II)

**Website:** [www.desico.com](http://www.desico.com)

---

## Gallagher

Gallagher's integrated security solutions cater to small and large organisations around the world. Gallagher leverages research, development and manufacturing capabilities to produce award-winning access control, intruder alarm and perimeter security systems. Security management is delivered through Gallagher's Command Centre platform, a powerful and versatile site management software system that enables operators to configure, monitor and control the security of their site.

**Product:** [Gallagher Command Centre](#)

**Interfaces to:** [INTREPID™ Series II](#) (RPM II)

**Website:** [security.gallagher.com](http://security.gallagher.com)

[Contact Gallagher](#)

## Genetec Inc.

Genetec is a global provider of IP license plate recognition (LPR) in the physical security and public safety industries, delivering video surveillance and access control solutions to markets such as transportation, education, retail, gaming, government and more. With sales offices and partnerships around the world, Genetec provides networked solutions by employing a high level of flexibility and forward-thinking principles into the development of its core technology and business solutions.

Genetec Security Center offers a complete integration with the INTREPID™ MicroPoint™ Cable and MicroPoint™ II perimeter fence detection systems, allowing security operators to receive real-time alarms from perimeter fences and monitor surveillance video associated with these events from Security Center.

**Product:** [Genetec Security Center](#)

**Interfaces to:** [INTREPID™ Series II](#) (RPM II)

## GEUTEBRÜCK GmbH

A German manufacturer and developer of high-quality, intelligent video security solutions, Geutebrück produces intelligent video security solutions which deliver the right information to the right place at the right time. Whether analogue, hybrid or digital, their systems focus on user needs, not on the latest fashion, allowing full concentration fully on the task in hand and confidence that the video security system is doing its job. Geutebrück systems are scaleable and flexible, with high levels of innovation, continuity and stability. All their product generations are fully compatible with one another, and today's hardware platforms already support tomorrow's features.

**Product:** [GeMIP – GeViSoft](#)

## Honeywell

Honeywell invents and manufactures technologies to address some of the world's toughest challenges initiated by revolutionary macro-trends in science, technology and society. A Fortune 100 company, Honeywell creates solutions to improve the quality of life of people around the globe: generating clean, healthy energy – and using it more efficiently, increasing safety and security and equipping customers to be even more productive. With more than 127,000 employees worldwide, Honeywell has an unrelenting commitment to quality and delivering results in everything they make and do.

**Product:** Enterprise Buildings Integrator – EBI R430, EBI R500  
**Interfaces to:** INTREPID™ Series II (RPM II)

**Website:** [www.buildingsolutions.honeywell.com](http://www.buildingsolutions.honeywell.com)

## IDS Sicurezza

Since 1975, I.D.S. Sicurezza has offered Italian security systems integration for commercial, industrial and residential markets. Their dedicated hardware and software solutions provide seamless communication between different specialized subsystems, and introduce external intelligence to reduce the need for human presence (guards) and optimize risk management. Custom-tailored solutions are part of their expertise. I.D.S. integrations permit EN 50131 and EN 50132 compliance and insurance approvals to ensure coverage for high-risk sites. Their Raptor platform can integrate CCTV systems with INTREPID™ systems, incorporating long range PTZ camera positioning with multiple cameras triggering on alarm.

**Product:** Raptor  
**Interfaces to:** MicroPoint™ Cable, MicroPoint™ II (IPP II), MicroTrack™ II (IPP II)

**Website:** [www.impiantidisicurezza.it](http://www.impiantidisicurezza.it)  
**Email:** [info@impiantidisicurezza.it](mailto:info@impiantidisicurezza.it)

## IndigoVision

IndigoVision is a manufacturer of complete IP video security solutions. When 'mission critical' really matters, people choose IndigoVision for our resilient solution backed by support. Working across 20 market sectors, they serve end users to improve operational efficiency, enhance public safety and enable timely emergency response. IndigoVision partners with some 500 trained system integrators in over 30 countries to provide local installation and service to end users all over the world.

**Product(s):** Control Center  
**Interfaces to:** INTREPID™ Series II (IPP II)

---

## Infinova Inc.

With solutions that enable end users to extend the life of their existing analog equipment by having it co-exist with their new IP video equipment, Infinova provides core equipment for video control rooms, megapixel, IP and analog surveillance cameras, specialized cameras, fiber optic communications products and customized systems. Infinova is acknowledged for its exceptional customer service programs as "the Integrator's Manufacturer."

**Product:** V2210 Series Matrix Switcher Video Management Software  
**Interfaces to:** MicroPoint™ Cable

---

## Initsys

A UK-based security software provider, Initsys specializes in the design and development of command and control software with PSIM, crisis and incident management and large-scale CCTV recording applications. Their software is used worldwide to protect critical infrastructure, assets and people.

**Product:** Merlin

**Interfaces to:** INTREPID™ Series II (IPP II)

**Documentation:** INTREPID™ Series II and Merlin Interfacing (pdf)

**Website:** [www.initsys.net](http://www.initsys.net)

**Email:** [admin@initsys.net](mailto:admin@initsys.net)

---

## Inner Range

Inner Range, an Australian-based company, designs and manufactures state-of-the-art access control and security solutions. Since its inception in 1988, over 120,000 Inner Range systems have been installed in over thirty countries. Inner Range's cost-effective and open platform systems, as well as its ability to integrate with other best-of-breed products, are what set it apart.

**Product:** Integriti

**Interfaces to:** INTREPID™ Series II (RPM II)

**Website:** [www.innerrange.com](http://www.innerrange.com)

**Email:** [admin@innerrange.com](mailto:admin@innerrange.com)

## Intergrated Security Manufacturing Limited

ISM is a manufacturer and inventor of integrated security management solutions, encompassing alarm monitoring, digital video security and sophisticated building security management systems. They also manufacture telephone entry, intercom, and disabled refuge systems.

**Product:** Genesys – Integrated Security & Control Room Management System

**Interfaces to:** MicroPoint™ Cable, MicroTrack™, INTREPID™ Series II (IPP II)

**Website:** [www.ism-uk.com](http://www.ism-uk.com)

**Email:** [info@ism-uk.com](mailto:info@ism-uk.com)

---

## Industrial Video & Control

Industrial Video & Control (IVC) is manufacturer of network video solutions for industrial installations. Based near Boston, Massachusetts, IVC is the global market leader in industrial network video, driving the integration of digital video with SCADA applications. IVC products and solutions focus on industrial surveillance and monitoring solutions for security, productivity, and safety applications. Our solutions are based on innovative, open technology platforms.

**Product:** Longwatch Video Surveillance System / Longwatch Video Control Center (VCC)

**Interfaces to:** MicroPoint™ Cable

**Website:** [www.ivcco.com](http://www.ivcco.com)

**Email:** [info@ivcco.com](mailto:info@ivcco.com)

---

## Milestone Systems

Founded in 1998, Milestone Systems provides open-platform IP video management software solutions. The XProtect® video management platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect® video management software provides solutions to video enable organizations managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners.

**Product:** XProtect® Video Management Software

**Interfaces to:** MicroPoint™ Cable, INTREPID™ Series II (IPP II, RPM II)

**Documentation:** XProtect® – INTREPID™ Series II Perimeter Module Integration (pdf)

**Demonstration Video:** INTREPID™ Series II Perimeter Module Milestone Plugin

**Website:** [www.milestonesys.com](http://www.milestonesys.com)

## Mirasys

Mirasys Ltd. supplies open-platform Video Management Systems (VMS). Mirasys surveillance systems that are used for loss prevention, perimeter protection, building management, and enhancement of operational efficiency by customers from many industries in over 40 countries. Based in Helsinki, Finland, the company operates through sales offices and Mirasys representatives in cooperation with leading distributors, system integrators, security service providers and system manufacturers. More than 50,000 customers use Mirasys systems with nearly one million cameras.

**Product:** [Mirasys VMS Enterprise](#)

**Interfaces to:** [INTREPID™ Series II \(IPP II\)](#)

**Documentation:** [VMS Enterprise INTREPID™ Series II Integration \(pdf\)](#)

## Nanodems

Nanodems provides state of the art Physical Security Information Management (PSIM) software, simplifying complex security problems by allowing multiple locations and systems to be managed by a single centralized platform. As an award-winning PSIM solution, thousands of different devices can be interconnected via ready to use, plug and play interfaces.

Nanodems services corporate, financial, state, and federal institutions, as well as schools and universities, the oil and gas industry, healthcare, banking, retail, manufacturing, transportation, airports, correctional facilities, law enforcement and homeland security.

**Product:** [NDIS PSIM](#)

**Interfaces to:** [INTREPID™ Series II \(RPM II\)](#)

**Website:** [www.nanodems.com](http://www.nanodems.com)

---

## Ossi

Ossi's Intelli-Site PSIM (Physical Security Management) solutions collect and correlate events from a variety of security devices and systems that provide greater situational awareness. This empowers personnel to positively identify and proactively resolve situations. The customizable software provides an easily-managed end user command and control solution. OSSI's Intelli-Site integrates 80 subsystems including: access control, digital video, fire, intrusion, perimeter detection, infant security, wander management, RFID, intercom, and other systems. Southwest Microwave provides superior perimeter detection as part of a complete PSIM solution.

Because OSSI's products have been tried and tested in the detention market, their solutions are the perfect fit for the growing demands of all security markets.

**Product:** [Intelli-Site V3.9](#)

**Interfaces to:** [INTREPID™ Series II \(IPP II\)](#)

## PRYSM Software

PRYSM was founded in 1996 with the goal of developing a management control room software application that would meet the needs of the security and building automation industries. The AppVision Building Manager was born. AppVision Building manager is available in several regions of the globe with over 1300 deployments (2010 figures) and many OEM brands available sold by international security companies. PRYSM has established great partnerships with many global and regional high tech companies to offer the AppVision building management product.

**Product:** [AppVision](#)

**Interfaces to:** [MicroPoint™ Cable](#), [MicroTrack™](#), [INTREPID™ Series II \(RPM II\)](#)

---

## PureTech Systems Inc.

PureTech's PureActiv™ automated surveillance system addresses critical security threats to safeguard lives, facilities and other high-value assets. While there are some similarities to more traditional digital video recorders (DVRs), the PureActiv system provides security professionals with accurate and reliable real-time alarms and video of suspicious activity in outdoor and remote environments while minimizing nuisance alarms. By incorporating PureTech's innovative geographic map presentation, advanced object detection and tracking, fence intrusion detection, automated camera steering, scalable video distribution, and automated security policy response, the PureActiv system provides situational awareness and proactive management of outdoor security threats to lives, critical facilities and assets. PureTech Systems is an Arizona-based corporation.

**Product:** PureActiv®

**Interfaces to:** MicroPoint™ Cable, MicroTrack™

**Documentation:** PureActiv® and INTREPID™ Integration (pdf)

**Website:** [www.puretechsystems.com](http://www.puretechsystems.com)

**Email:** [info@PureTechSystems.com](mailto:info@PureTechSystems.com)

---

## Rockwell Collins

Rockwell Collins ARINC Security designs, installs, operates and maintains mission-critical security systems. ARINC's security solutions leverage the AIM software platform, which has been configured to provide the core functions of a security management system, including intrusion detection, access control, video management, credential management, biometric-based identity management, vehicle identification, asset management, and integrated Geographical Information Systems (GIS).

**Product:** Advanced Information Management (AIM®) System

**Interfaces to:** MicroPoint™ Cable, MicroPoint™ II (RPM II)

**Website:** [rockwellcollins.com/arinc/security](http://rockwellcollins.com/arinc/security)

**Email:** [arincdirectsales@rockwellcollins.com](mailto:arincdirectsales@rockwellcollins.com)

---

## Synectics

Synectic Systems Group Ltd (Synectics) is a wholly-owned subsidiary of the UK-based Quadnetics Group Plc. Synectics is a developer and manufacturer of innovative and integrated security systems with 25 years' experience providing surveillance systems throughout Europe, North America and the Middle East. Delivering protection for national, civil and commercial critical infrastructure, Synectics systems are used in the world's most demanding security environments.

**Product:** SynergyPro

**Interfaces to:** MicroPoint™ Cable, MicroTrack™, INTREPID™ Series II (IPP II)

**Documentation:** Synectics Synergy INTREPID™ Interface (pdf)

**Website:** [www.synx.com](http://www.synx.com)

## Tyco | CEM Systems

CEM Systems AC2000 access control and integrated security management systems from Tyco/Johnson Controls, secures sites around the world where security is paramount. With 30 years' experience, CEM Systems uniquely manufactures both the access control system hardware and software and performs high level system integrations for projects, offering one of the most comprehensive, resilient and flexible security systems available today. Using the AC2000 Security Hub platform, AC2000 provides one powerful command and control front-end for multiple building management systems including access control, video, intrusion, fire and perimeter detection.

**Product:** AC2000

**Interfaces to:** INTREPID™ Series II (RPM II)

### **VTZ**

Established in 1990, VTZ is a highly specialized provider of technical security solutions. As an ISO 9001:2008 certified company with a successful history of more than 15,000 security system installations, VTZ relies on high-quality equipment and services that are enriched by experience, tradition, reliability and innovation. VTZ has a longstanding record of system implementations in Slovenia's most high-profile, security-sensitive sites.

The Knight security system provides an integrated, user-friendly security monitoring and management solution that reduces the need for the intervention of security personnel.
